Clean sediment out of blue catch basin.

Reset the pavement blocks on north side of church.

Contact: Gordon C.

Several wheelbarrow loads of sediment were removed from the catch basin. The pavers were leveled, and weeds were removed. This will prevent the drainage system from clogging and will keep surface water flowing away from the building.

## Times and Mite Boxes Change

Mite Boxes have changed in color and design over the years, but what has never changed is the dedication of freely given offerings for the purpose of reaching out to others with the Good News of Jesus Christ. Districts still retain 75% of mite offerings for the work of the LWML at that level. National mites fund over \$1 million in mission grants. See [Mission Grants](#) for the current grant recipients and payments.
